In July 2009, the Commissioner of the NJ Department of Banking and Insurance approved revisions to the Plan of Operation. A key revision requires the Association to formally close policy years and complete a final accounting for each policy year closed. The Plan of Operation allows the Board of Directors to distribute net gains or assess for deficits. Any assessments or distributions shall be apportioned among the member companies using each member company’s apportionment share for the policy year being closed. Assessments or distribution of net gains for a closed policy year will be considered by the Board only after careful review of the Association’s future cash flows, claims-paying ability, anticipated investment results and other balance sheet considerations that may affect the operating needs of the Association.

At the Board of Directors meeting held on Thursday, July 11, 2019, the Board unanimously approved the closing of policy year 2016.

Pursuant to the revised Plan of Operation, policy year 2016 is the ninth year we began closing a policy year 42 months after each of the beginning of the policy years. The 2016 policy year closeout resulted in a net gain of $2,145,490. After careful consideration of all matters, the Board voted unanimously for the retention of the net gain.

Please note when recording your apportionment of the above amount into your books and records, you should use your company’s 2016 participation ratio to calculate your share of the Association’s 2016 policy year net gain of $2,145,490.
